

Anton Marcelo

HR and Rostering Assistant

Anton is a graduate of the Bachelor of Arts in Psychology from De La Salle University-Manila, one of the top universities in the Philippines, and was on the dean's list. He also recently graduated from the Master of Public Health program at Macquarie University, a high-ranking Australian university located in New South Wales.

A fast learner and well-versed in technological appliances and applications, Anton is a go-to for anything digital. From the simple to complex, he can figure out how to make anything happen—a must during this time of rapid digitalisation. But this does not limit him from being a gifted face-to-face conversationalist; Anton can make people comfortable in any situation without sacrificing professionalism.

Anton's communication skills reach farther than just his overall band score of 8.0 on the IELTS. He is known for his curious mind, always asking about the minute details some don't even think about. Quick on his feet, Anton's propensity for coming up with clever methods can assure any team that their targets will be hit.

Humility, insight, respect, and simplicity are the values Anton upholds in anything he strives to excel in. You can count on Anton to be able to forge long-lasting relationships for the company because he always thinks about how to ensure every party can end up happy in any arrangement. Anton's end goal is to be able to use his skills to help others create a better life, and so his effort will always show up in his work.

“The glue that keeps the care team seamlessly connected.”
